Instruction Manual

Check Valve model GS.45

The clapet check valve, Mod. GS.45 is designed to standards of maximum simplicity and efficiency. This makes for very easy maintenance.

To place the flat rubber cap:

1. Remove the bolt, kasher and nut (part.6-5-4).
2. Having done this, open up the valve body (part.1-2), take out the old rubber cap (part.3) and replace it with the new one.
3. Bolt the valve body (part.1) to the valve body (part.2) and the whole valve will be as efficient as when new.

N.B. All part numbers will be found in our technical and parts catalogue.
